### Summary of Analysis\*

**Area Unique Identifier:** CDCA309A/Chemehuevi Wash

#### Summary

Results of analysis:

(Note: explain the inventory findings for the entirety of the inventory unit. When wilderness characteristics have been identified in an area that is smaller than the size of the total inventory unit, explain why certain portions of the inventory unit are not included within the lands with wilderness characteristics (e.g. the inventory found that certain parts lacked naturalness).

1. Does the area meet any of the size requirements? Yes ☒ No ☐
2. Does the area appear to be natural? Yes ☒ No ☐ N/A ☐
3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? Yes ☐ No ☒ N/A ☐
4. Does the area have supplemental values? Yes ☐ No ☐ N/A ☒

Check one:

☐ The area, or a portion of the area, has wilderness characteristics and is identified as lands with wilderness characteristics.

☒ The area does not have wilderness characteristics.

\* This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

**FORM 1**

**Documentation of BLM Wilderness Characteristics Inventory Findings from Previous Inventory on Record**

**1. Is there existing BLM wilderness characteristics inventory information on all or part of this area?**

☐ **No** (Go to Form 2)

☒ **Yes** (If yes, and if more than one area is within the area, list the unique identifiers for those areas.):

**a) Inventory Source:** California Desert Conservation Area Wilderness Inventory 1979

**b) Inventory Area Unique Identifier(s):** CDCA309

**c) Map Name(s)/Number(s):** USGS, California 1:100,000: 34114-e1 Needles  
USGS, California 1:100,000: 34114-a1 Parker

**d) BLM District(s)/Field Office(s):** California Desert District/Needles Field Office

**2. BLM Inventory Findings on Record:**

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory area is associated with the area, list each area and answer each question individually for each inventory area):

**Inventory Source:** Needles Field Office Inventory

Area Unique Identifier	Sufficient Size? Yes/No (acres)	Naturalness? Yes/No	Outstanding Solitude? Yes/No	Outstanding Primitive & Unconfined Recreation? Yes/No	Supplemental Values? Yes/No

## FORM 2

### Current Conditions: Presence or Absence of Wilderness Characteristics

Area Unique Identifier: **CDCA309A/Chemehuevi Wash**

Acreage: **13,969 acres**

(If the inventory area consists of subunits, list the acreage of each and evaluate each separately).

In completing steps (1)-(5), use additional space as necessary.

(1) Is the area of sufficient size? (If the area meets one of the exceptions to the size criterion, check "Yes" and describe the exception in the space provided below),

Yes   √   No       

Note: If "No" is checked the area does not have wilderness characteristics; check "NA" for the remaining questions below.

Description (describe the boundaries of the area--wilderness inventory roads, property lines, etc.):

**This triangular area's northern boundary Havasu Landing Road until the intersection with NS056 when it then turns and enters into Chemehuevi Wash. In Chemehuevi Wash, it intersects with NS520, which forms its southeast boundary. The western boundary is NS683 Parker to Needles Wagon Road.**

(2) Does the area appear to be natural?

Yes   √   No        N/A       

Note: If "No" is checked, the area does not have wilderness characteristics; check "NA" for the remaining questions below.

Description (include land ownership, location, topography, vegetation, and summary of major human uses/activities):

**The area is natural in appearance between designated routes within the unit. Chemehuevi Wash splits the unit into two parts subdividing the area in the north from the south. The south is heavily vegetated with ironwood, palo verde and other desert woodland species. North of the wash, the area is scattered with ocotillo stands and occasional small stands of Bigelow cholla. After rain events, the entire valley takes on a bright orange coloration. Areas of desert pavement are also common, and it is on these that evidence of past WWII activities related to the Desert Training Center/California-Arizona Maneuver Area can be found.**

(3) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for solitude?

Yes \_\_\_\_\_ No ✓ N/A \_\_\_\_\_

Description (describe the area's outstanding opportunities for solitude):

**Increased off-highway vehicle traffic and backcountry recreation has greatly decreased the outstanding opportunities for solitude.**

(4) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for primitive and unconfined recreation?

Yes \_\_\_\_\_ No \_\_\_\_\_ N/A ✓

Note: If "No" is checked for both 3 and 4 the area does not have wilderness characteristics; check "NA" for question 5.

Description (describe the area's outstanding opportunities for primitive and unconfined recreation):

**The large size of the unit offers ample space for both vehicular recreation and primitive and unconfined recreation. Many of the location population utilize both horses and side-by-side recreational vehicle to explore the area.**

(5) Does the area have supplemental values (ecological, geological, or other features of scientific, educational, scenic or historical value)?

Yes \_\_\_\_\_ No \_\_\_\_\_ N/A ✓

Description:

**The California Desert Protection Act states that the BLM must "protect and preserve historical and cultural values of the California desert associated with ancient Indian cultures, patterns of western exploration and settlement, and sites exemplifying the mining, ranching and railroading history of the Old West". Most recently, the former California/Arizona WWII Troop Camps have been added to areas of protection.**

## WILDERNESS CHARACTERISTICS INVENTORY

### APPENDIX C – ROUTE ANALYSIS<sup>1</sup>

*(Factors to consider when determining whether a route is a road<sup>2</sup> for wilderness characteristics inventory purposes.)*

**Route Analysis Table**

Route #		Purpose	Row	Construction Mechanically or Improved Mechanically	Is it in regular or continuous use	Maintenance if needed	WIU Road	Photo Points
1	NS510	Recreation	No	Yes	Yes	Not Currently	Yes	
2	NS513	Recreation	No	Yes	Yes	Not Currently	Yes	
3	NS896	Recreation	No	Yes	Yes	Not Currently	Yes	
4	NS515	Recreation	No	Yes	Yes	Not Currently	Yes	
5	NS526	Recreation	No	Yes	Yes	Not Currently	Yes	

#### **Route Map:**

Wilderness Characteristics Inventory Area Unique Identifier: **CDCA309A/Chemehuevi Wash**

Route or Route Segment<sup>3</sup> Name and/or Identifier: **See Table**

(Include Transportation Plan Identifier, if known, and include route number supplied by citizen information, when available.)

#### **I. LOCATION:**

Refer to above map **CDCA309A/Chemehuevi Wash** and BLM corporate data (GIS) located at the California State Office. List photo point references (where applicable) or reference attached photo log:

Describe:

**As stated in Form 2, this triangular area's northern boundary Havasu Landing Road until the intersection with NS056 when it then turns and enters into Chemehuevi Wash. In Chemehuevi Wash, it intersects with NS520, which forms its southeast boundary. The western boundary is NS683 Parker to Needles Wagon Road.**

---

<sup>1</sup> This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

<sup>2</sup> Road: An access route which has been improved and maintained by mechanical means to insure relatively regular and continuous use. A way maintained solely by the passage of vehicles does not constitute a road.

- a. Improved and maintained – Actions taken physically by people to keep the road open to vehicle traffic. —Improved does not necessarily mean formal construction. —Maintained does not necessarily mean annual maintenance.
- b. Mechanical means – Use of hand or power machinery or tools.
- c. Relatively regular and continuous use – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources, access roads to maintained recreation sites or facilities, or access roads to mining claims.

<sup>3</sup> If a portion of a route is found to meet the wilderness inventory road criteria (see Part III) and the remainder does not meet these criteria (e.g., a cherrystem road with a primitive route continuing beyond a certain point), identify each segment and explain the rationale for the separate findings under pertinent criteria.

## II. ROUTE CONTEXT

- A. Current Purpose<sup>4</sup> (if any) of Route: (Examples: Rangeland/Livestock Improvements (stock tank, developed spring, reservoir, fence, corral), Inholdings (ranch, farmhouse), Mine Site, Concentrated Use Site (camp site), Recreation, Utilities (transmission line, telephone, pipeline), Administrative (project maintenance, communication site, vegetation treatment)).

Describe:

**The BLM Needles Field Office (NFO) developed the Mojave Adventure Route System (MARS). This system of designated routes was developed to minimize resource damage, as well as providing a system of backcountry touring routes, which offer ample recreational experiences: (i.e., camping, hunting, rockhounding, etc.). The NFO receives funding annually from both federal and state programs to maintain and monitor on a need to basis, the management of these routes also includes the placement of field cameras for the monitoring of use, repairing flood damage, and the placement of route signs and informational kiosks.**

- B. Right-of-Way (ROW):

1. Is there a ROW associated with this route?

Yes \_\_\_\_\_ No ✓ Unknown \_\_\_\_\_

2. If yes, what is the stated purpose of the ROW?

3. Is the ROW still being used for this purpose?

Yes \_\_\_\_\_ No ✓ Unknown or N/A \_\_\_\_\_

Explain:

**Right-of-Ways are associated with all boundaries. Boundary routes support 250-foot electrical high-tension towers. Gasline easements area also in place both the north and south boundaries.**

## III. WILDERNESS INVENTORY ROAD CRITERIA

- A. Evidence of construction or improvement using mechanical means:

Yes ☒ (if either A.1 or A.2 is checked "yes" below) No ☐ (if both A.1 and A.2 are checked "no" below)

1. Construction: (Is there evidence that the route or route segment was originally constructed using mechanical means?) Yes ☒ No ☐

Examples: Paved ☐ Bladed ☒ Graveled ☐ Roadside Berms ☒ Cut/Fill ☒ Other ☐

Describe: **This information can be found in past inventories of the area.**

<sup>4</sup> The purpose of a route is not a deciding factor in determining whether a route is a road for wilderness characteristics inventory purposes. The purpose of a route does provide context for factors on which such a determination may be based, particularly the question of whether maintenance of the route ensures relatively regular and continuous use. The purpose also helps to determine whether maintenance that may so far have been unnecessary to ensure such use would be approved by BLM when the need arises.

2. Improvements: (Is there evidence of improvements using mechanical means to facilitate access?) Yes ☒ No ☐ If "yes": by Hand Tools ☐ by Machine ☐

Examples: Culverts ☐ Hardened Stream Crossings ☐ Bridges ☐ Drainage ☐ Barriers ☐ Other ☒

Describe: **BLM maintenance teams continue to maintain the area for ease of access after flooding events, primarily by dragging the route.**

B. Maintenance: (Is there evidence of maintenance that would ensure *relatively* regular and continuous use?): Yes ☒ (if either B.1 or B.2 is checked "yes" below) No ☐ (if both B.1 and B.2 are checked "no" below)

1. Is there Evidence or Documentation of Maintenance using hand tools or machinery?

Yes ☒ No ☐ If "yes": by Hand Tools ☐ by Machine ☐

Explain: **BLM maintenance team monitors and signs annually as needed.**

2. If the route or route segment is in good<sup>5</sup> condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM to meet the purpose(s) of the route in the event this route became impassable?

Yes ☒ No ☐

Explain: **As part of the MARS, the route would continue to receive maintenance by the NFO on a need to basis.**

<sup>5</sup> Good condition would be a condition that ensures regular and continuous use relative to the purposes of the route. Consider whether the route can be clearly followed in the field over its entire course and whether all or any portion of the route contains any impediments to travel.

C. Relatively regular and continuous use: (Does the route or route segment ensure relatively regular and continuous use?) Yes √ No       

Describe evidence (e.g., direct, vehicles or vehicle tracks observed, or indirect, evidence of use associated with purpose of the route such as maintenance of facility that route accesses) and other rationale for whether use has occurred and will continue to occur on a *relatively* regular basis (i.e., regular and continuous use relative to the purpose(s) of the route).<sup>6</sup>

Describe: **See above information.**

#### IV. CONCLUSION:

Does the route or route segment<sup>7</sup> meet the definition of a wilderness inventory road (i.e., are items III.A and III.B and III.C all checked yes)?

Yes √ = Wilderness Inventory Road No        = Not a road for wilderness inventory purposes

Explanation<sup>8</sup>:

**Routes belonging to the Designated Route System will be maintained as needed. Routes not designated through the land plan will not be considered a route and therefore will be considered closed.**

**Closed routes will be evaluated for their use. Routes used to maintain Grazing Infrastructure (Taylor Grazing Act), Herd Management Areas and facilities for the California Fish and Wildlife Department (California Desert Protection Act) will be closed with gates, and barricades, all other routes will be closed through restoration and/or barricades.**

Evaluator(s):  Date: 10/10/2015

<sup>6</sup> Include estimate of travel rates for the stated purposes, e.g., trips/day or week or month or season or year or even multiple years in some facility maintenance cases.

<sup>7</sup> If part of the route meets the wilderness inventory road definition and the remainder does not, describe the segment meeting the definition and any remaining portion not meeting the definition and why.

<sup>8</sup> Describe and explain rationale for any discrepancies with citizen proposals.
